Standard CPAP Tubing

GEMCORE360° Standard CPAP Tubing is constructed of high-quality, durable materials. The innovative smooth bore inner core and crenelated outer surface combine to create a lightweight, flexible tube that provides a quiet connection between the mask and the machine. Reusable and washable, the durable medical grade rubber 22mm end caps create a tight seal. Each tube is individually packaged in a sealed bag for single patient use.

GEMCORE360° Standard CPAP Tubing is universal to all CPAP masks and works with most CPAP, APAP, BiPAP, and BiLevel machines that use standard CPAP tubing.

Product Features:

- Lightweight, flexible tubing
- 22mm cuff connectors
- Standard 6-foot length
- Universal to all masks and most CPAP, APAP, BiPAP, and BiLevel machines
- Latex-free
- Grey color
- Single patient use

Slim Fit CPAP Tubing

At only 15mm in diameter, GEMCORE360° Slim Fit CPAP Tubing is slimmer, thinner and more flexible than standard CPAP tubing. The ultra-light design provides a more forgiving connection to the CPAP machine so it's less likely to pull on the mask and disrupt the seal when sleeping. Reusable and washable, the durable medical grade rubber 22mm end caps create a tight seal. Each tube is individually packaged in a sealed bag for single patient use.

GEMCORE360° Slim Fit CPAP Tubing is universal to all CPAP masks and works with most CPAP, APAP, BiPAP, and BiLevel machines that use standard CPAP tubing.

Product Features:

- 15mm diameter
- Lightweight, flexible tubing
- 22mm cuff connectors
- Standard 6-foot length
- Universal to all masks and most CPAP, APAP, BiPAP, and BiLevel machines
